## SECTION I

# Explanation of German Military Symbols

---

1. The German Armed Forces use military symbols to a wide extent on their maps and charts, on task force tables of organization, on direction and location sign posts in combat zones, and even on armament and equipment. A thorough knowledge of these symbols, as well as the principles on which they are formulated, will assist intelligence personnel in making German identifications in combat.

2. German military symbols are designed to resemble the armament and establishments which they represent. The more complicated symbols are simply a logical development of the simple basic ones. Once the system of German military symbols is understood, intelligence personnel can deduce the meaning of unknown and new symbols.

3. The system of German military symbols will be explained by illustrative examples in the following paragraphs.

4. Particular attention is called to the symbols with a thickened line. They represent a unit of company strength.

5. Here is the basic German military symbol for a heavy machine gun:  By thickening the center line, the symbol represents a Machine Gun Company: 

6. Herewith is the basic symbol for a gun:  It will

now be explained how this symbol is developed to represent the various types of guns and the organizations which man them.

a. The basic symbol for an infantry howitzer (75-mm Howitzer in the 13th Company of an Infantry Regiment) is as follows:  By thickening the center line, the symbol represents the Infantry Howitzer Company: 

b. The basic gun symbol , with a forked base represents an antitank gun:  Likewise, the addition of a circle represents an antiaircraft gun: 

c. The addition of an extra line to a gun symbol usually indicates a larger caliber. Thus, a 75-mm infantry howitzer:  becomes a 150-mm infantry howitzer by the addition of another line to the symbol:  Also, the symbol for a 50-mm infantry mortar:  becomes the symbol for the 81-mm mortar: 

7. A motorized unit is indicated by two small wheels on the unit symbol:  A partially motorized unit is represented by one wheel only:  = Partially

Motorized Telephone Company. Self-propelled mounts are represented by the symbol: . Thus,  = Anti-tank Battalion Headquarters on Self-propelled Mount.

8. Command Posts or unit headquarters are shown by flag symbols. The shape and marking of the flag denotes the size of the command. Thus:

-  General Headquarters.
-  Army Group Headquarters.
-  Army Headquarters.
-  Corps Headquarters.
-  Divisional Headquarters.
-  Brigade Headquarters.
-  Regimental Headquarters.
-  Battalion Headquarters.
-  Company Commander.

9. Arms and Services have their own distinguishing symbols:

-  ..... Air.
-  ..... Antiaircraft Artillery.

#### 10. Basic Symbols for Weapons:

	Machine Gun.
	Mortar.
	Infantry Howitzer.
	Flame-Thrower.
	Antitank Rifle.

 ----- Antitank Gun.

 ----- Field Gun.

 ----- Field Howitzer.

 ----- Medium Gun (100 mm).

As previously indicated, these basic symbols can be supplemented by adding  $\cap$  —  $\wedge$   $\circ$ . Each addition of one of these signs indicates an increase in caliber:

 Heavy Machine Gun.

 Heavy Mortar.

11. Basic symbols for weapons, symbols for arms and services, and the flags of headquarters may all be combined. Here, for example, is an illustration of the flexibility and adaptability of the German system of military

symbols:  This character represents a Mountain Artillery Battalion Headquarters. Note the combination of three elements, e. g.,  (Battalion Headquarters),  (Artillery), and  (Mountain).

12. Supplementary letters which are used to show special employment (F, Gr, Ls, Sich, St, Str, Wa, etc.) are always found on the left of the symbol, e. g.  Fortress Engineer Regimental Headquarters.

Other letters, used to denote the nature and organic assignment of a formation, are found on the right of the

symbol:  Motorized Army Signal Battalion Headquarters.

In a few exceptional cases, the letters are found above, below, or within the military symbol.

### 13. Supplementary numbers.

a. Headquarters of Armies, Divisions, Regiments, Independent Battalions, Companies, etc. carry an arabic numeral on the right side of the military symbol as a designation of the unit, e. g.,  10th Infantry Regiment.

b. Headquarters of Army Corps and Battalions within a Regiment are shown by the use of Roman numerals:

 VIII Army Corps Headquarters.

 2nd Battalion, 67th Infantry Regiment.

c. A figure below a military symbol sign indicates the number of weapons in a unit or the tonnage capacity of columns, ferries, and bridges:

 3 Light Machine Guns.

 2 Infantry Howitzers (75 mm).

14. It will be noticed that, in certain instances, there are alternate military symbols for the same subject. This is in no wise a deviation from a consistent pattern, but rather further testimony to the logic of the German system. Some German commander, not knowing the precise symbol, has put one together from well-known basic signs.

The resultant symbol is fully as comprehensible as the official one.

15. In the translation of German terms, an attempt has been made to approximate, as closely as possible, equivalent units in the Army of the United States. In many instances, however, no equivalents exist, necessitating a literal translation.

16. An effort has been made to employ only those German terms which are officially used to designate a particular military symbol. The absence of German opposite many of the symbols is explained by lack of authoritative nomenclature.

17. The following changes in nomenclature, arriving too late for inclusion in this book, should be noted:

Infanterieregiment should read Grenadierregiment  
leichte Division should read Jägerdivision (except  
"leichte Afrika-division").

## APPENDIX II

### NON-OFFICIAL AUXILIARY SIGNS

In addition to the foregoing military symbols, there exists a number of non-official, auxiliary signs. These representations may be found in training manuals and instruction books by independent authors, in military encyclopedias, in tactical books by military writers, and in some German Army Regulations where the symbols are not designated as "tactical."

Since the designers of these auxiliary signs worked independently, it follows that there can be no uniformity to the following series. It will be noted that two and sometimes three signs are given for one subject, and even this does not exhaust the possibilities.

No attempt has been made to compile an extensive list of these auxiliary signs. Only those most frequently encountered are given here.

#### Erläuterungen zur Marschlängenübersicht.

Die Angaben über Längen und Zeiten der nachfolgend aufgeführten Einheiten bilden einen Anhalt für die Marschlängen beim Fahren und Halten. Hierbei sind bereits marschtechnische Einflüsse, Verbands- und Einheitsabstände und zur Regelung des Marsches eingesetzte Fahrzeuge berücksichtigt.

Die Einheiten der Jnf.-Div. (mot) gleichen vielfach denen der Pz.-Div., sodas nur die hiervon abweichenden Einheiten aufgeführt sind.

Als Abstand ist berechnet: Jm Fahren Tachoabstand, mindestens aber 20 m, im Halten 4 u. 20 m.

Als Abstand zwischen den Einheiten: Jm Fahren 50 m, bei Geschwindigkeiten über 50 km/Std., Tachoabstand, im Halten 25 m.

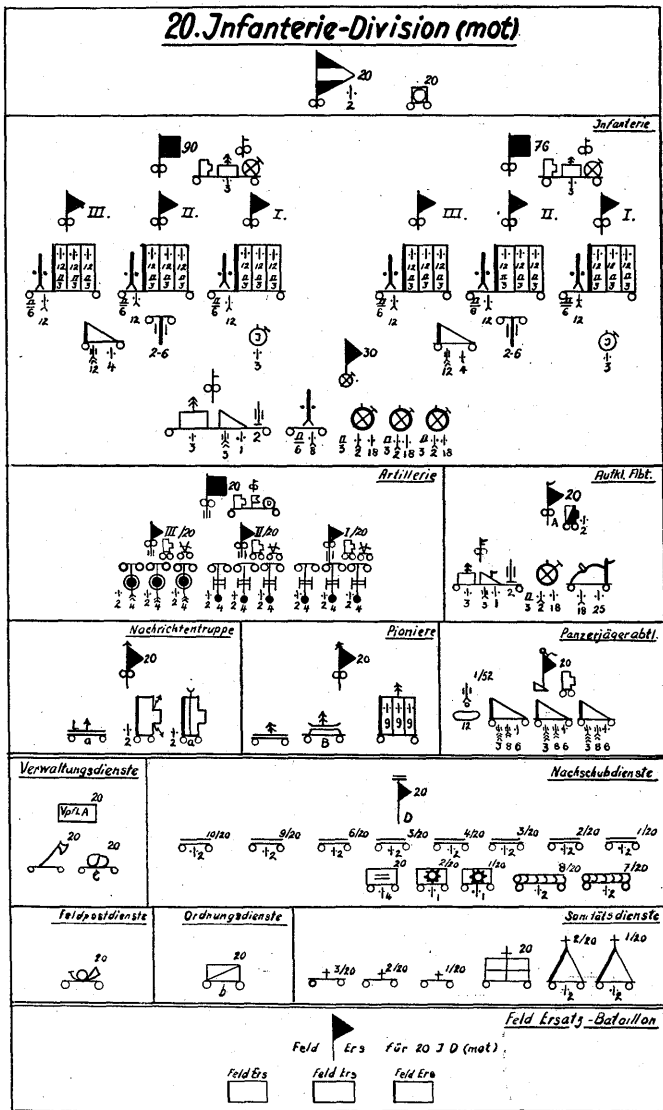

Als Abstand zwischen den Verbänden: Jm Fahren 250 m, im Halten 150 m.

Bei Nebel, Staub, Dunkelheit und unübersichtlichen Wegen verringern sich die Geschwindigkeiten und Fahrzeugabstände erheblich. Diese Einflüsse, sowie die jeweiligen Kampfverluste und Marschausfälle müssen in jedem einzelnen Fall bei Benutzung der Tabelle berücksichtigt werden.

<b>Erläuterung zur Pz.-Div. und (mot.) J. Div.</b>		
<p><u>Die Gesamtlängen</u> der Pz.-Div. sowie der Jnf.-Div. (mot) ergeben sich unter Berücksichtigung dessen, daß die gesamte Div. auf einer Straße einen längeren Marsch zurückzulegen hat. Es sind daher auch die rückwärtigen Dienste, sowie Gef. Tr. II und Kolonnen mit eingerechnet. Nicht eingerechnet sind Feldgend., sowie 10 % aller Fhrzg., die für Erkundung, Melde- und Absperrdienst eingesetzt sind.</p>		
<p><u>Die fechtende Truppe</u> der Pz.-Div. und Jnf.-Div. (mot) ist hier noch ohne taktische Abstände berechnet. Um die Marschlängen der Div. in Vormarsch mit Sich-Abst. zu erhalten, müssen die jeweiligen Marschgr.-Abstände, sowie die Anzahl der bereits eingesetzten Truppen (A.A., Flak usw.) berücksichtigt werden.</p>		
<p>Für Melde-, Erkundungs- u. Absperrdienst, sowie durch Weglassen des Gef. Tr. II und der Kolonnen sind die Einheiten um 20 % verkürzt.</p>
